fully revised second edition since breaking through bias was published in 2016 the metoo movement has exposed just how pervasive sexual harassment is in the workplace the increase in public misogynistic comments has made clear that explicit gender bias is not a thing of the past and stay at home orders and school closings due to covid 19 have brought into even sharper focus the discriminatory impact of the unequal division of child care and household responsibilities between most couples in this second edition of breaking through bias the authors kramer and harris explain how these recent developments fit into a larger pattern of implicit or unconscious gender bias that imposes serious obstacles to women s career advancement they argue persuasively however that while this bias is the result of deeply rooted gender stereotypes women can avoid or overcome its discriminatory consequences by the effective use of attuned gender communication to manage the impressions other people have of them kramer and
