This book is a novel sophisticated broad ranging and insightful study of the idea of global environmental governance but from a legal dimension and perspective while recognising that concepts and ideas used to describe governance are generally abstract vague and slippery this project brings clarity to the field by being theoretically informed contextually sensitive and pragmatically circumscribed its conclusions and arguments open up a field of inquiry that has to be genuinely interdisciplinary and in that sense has great potential to contribute to a better understanding of environmental themes and issues. This book is destined to become a landmark for legal academics who will write about environmental governance in that its concern is with the global governance of nature rather than a text that uses the environment as a pretext for understanding governance. It is well written easy and enjoyable to read and while it traverses through diverse bodies of literature it manages to effectively communicate with a variety of scholarly communities.

Fourth generation global environmental regulation attempts to address the complex realities of an interconnected environment. Global environmental problems and collective regulatory responses merit conceptual clarity.

Louis KotzŹ reveals the legal contours and content of global environmental governance by chipping away such parts of the conceptual marble block as are not needed for the environmental lawyer. It is a welcome and much needed process of elimination. This book provides a toolkit for lawyers to engage critically with the extra legal concept of environmental governance. Its scrutiny and careful analysis contribute meaningfully to the environmental discourse.
